During the manufacturing process, we have endeavored to incorporate the very finest in material, craftsmanship and, with a reasonable amount of care, your gun will provide many years of pleasure and dependable service.

Thank You
Khanshotguns

Safety Warnings

Regardless of your familiarity or experience with firearms, don't assume that you have no need to study this manual.

The safe handling of firearms requires specialized training, discipline and caution. Firearms, by their nature and intended function, are deadly instruments. Accidental death or serious injury can result if they are handled improperly or carelessly.

A person with a gun in his possession has a full-time responsibility. He must KNOW how to keep and use his firearm safely, and then must always TAKE the necessary precautions. He cannot guess; he cannot forget. This responsibility is his alone. It cannot be passed off to someone else.

Remember: No gun can be made accident-proof. A gun is just a machine, with no judgement of its own. It responds to your actions, whether wise or foolish. The only truly effective safety device is the mind of a cautious shooter who never forgets that a moment's carelessness can produce permanent tragedy.

IMPORTANT - Our shotguns are designed, manufactured and proof-tested for use with fresh factory loaded ammunition. Improperly loaded shells are dangerous.

Khanshotguns does not assume responsibility for damages or injury caused by reload or improperly loaded ammunition. This shotgun should not be used with broken, missing or altered parts.

WARRANTY

"This product is under manufacturer's warranty which covers defects in materials and / or workmanship for one full year after date of original new gun retail purchase."

Your survivel shotgun can be used for both steel and lead shots.

Commandments of Firearm Safety

A good hunter is a safe hunter. He knows there is no place for horseplay in hunting. He learns and obeys the commandments of firearms safety and insists that his companions know and follow them too. Every hunter-whether novice or experienced outdoorsman should review these commandments before each hunting season to be sure that his gun handling, both at home and in the field, sets a good example for others.

1. Don't rely on your gun's safety. Treat every gun as if it were loaded and ready to fire. Install gunlock when not in use.
2. Don't shoot unless absolutely sure of your target and what is beyond it.
3. Always be sure the barrel is clear of obstructions.
4. Never point your gun at anything you do not want to shoot. Watch your muzzle so the other person doesn't have to.
5. Never leave your gun unattended unless you unload it first.
6. Avoid alcoholic beverages both before and during shooting.
7. Never carry a loaded gun when you climb a tree, cross a fence, jump a ditch or go through areas where you are apt to slip or trip.
8. Never shoot at a hard, flat surface or the surface of water. Make sure you have a safe backstop.
9. Carry only empty guns, taken down or with the action open, into your camp, car or home.
10. Store locked guns and ammunition separately, beyond the reach of children.
11. Never insert a shell of the incorrect gauge in any shotgun and use shell of correct length.

KHAN CENTURION SURVIVAL SHOTGUN

The Khan Survival shotgun is manufactured with the latest computerized machinery to industry standards using the finest material and craftmanship. The end result is a reliable, lightweight shotgun that looks great and will provide the owner with many years of reliable service.

OPERATION OF YOUR SHOTGUN

Your shotgun operates when the hammer is manually pulled back to its rearmost position, the transfer bar moves up and is positioned between the face of the hammer and the rearmost portion of the firing pin so that when the hammer is released by pulling the trigger, the face of the hammer will strike the transfer bar which, in turn strikes the firing pin which fires the shot shell.

LOADING YOUR SHOTGUN

Before loading this firearm, always check the bore to be sure it is free of grease, oil or any other obstruction. Be sure the chamber is empty. With the muzzle pointed in a safe direction, manually pull back the trigger guard and pull the barrel down. Insert the appropriate gauge shot shell in the chamber and then lift up on the barrel which will cause it to close into the receiver.

DE-COCKING

If the shotgun is fully cocked and the user desires to place the hammer in the rest position, then the hammer must be under full control of the user.

"KEEP THE MUZZLE POINTED IN A SAFE DIRECTION. WHILE CAREFULLY HOLDING AND CONTROLLING THE HAMMER WITH THE THUMB, PULL THE TRIGGER, SLOWLY AND CAREFULLY LET THE HAMMER MOVE FORWARD APPROXIMATELY 1/2" AND RELEASE THE TRIGGER. CONTINUE TO LET THE HAMMER DOWN UNTIL IT IS FULLY FORWARD.

HOW TO FIRE

Always be sure the shotgun is pointed at the target and away from other objects before firing. With the gun pointed at the target, utilize your thumb to pull the hammer back to the full-cock position. Then pull the trigger to fire the shotgun.

UNLOADING YOUR SHOTGUN

To unload the shotgun, manually pull back the trigger guard and pull down on the barrel. The fired or unfired shells will be ejected by the extractor, and you can take the shells out with your fingers.
